

Analyzing trends in Canadian glacier mass

Anton Antonov

Introduction

The data used in this study is taken from <http://open.canada.ca/en/open-data>.

The data set contains 518 measurements of 6 Canadian glacier mass balance, collected from 1960 till 2007. Namely, the file includes these glaciers:

```
## [1] "Devon Ice Cap NW - Devon Island, Nunavut"
## [2] "Helm Glacier - southern Coast Mountains (Garibaldi Provincial Park), British Columbia"
## [3] "Meighen Ice Cap - Meighen Island, Nunavut"
## [4] "Peyto Glacier - Rocky Mountain eastern slopes (Banff National Park), Alberta"
## [5] "Place Glacier - southern Coast Mountains, British Columbia"
## [6] "White Glacier - Axel Heiberg Island, Nunavut"
```
